Lightning Sisu

VETERINARIAN CERTIFICATE

Name: Lightning Sisu 21-2559

UELN: 75200211S212559

Born: 2021-06-25

Chipnumber: 752098200000218

Clinical examination

General impression: bright, alert, responsive

Muscles: The horse is muscular and in good nutritional condition. There is some asymmetry in pelvis; right side is moderately lower compared to left side.

Heart and respiratory system: Heart rate normal, no murmurs, regular rhythm. Jugular refill time normal. Respiratory rate normal, no crackles or wheezes, breathing pattern normal. Cough reflex test negative.

Mucous membranes are moist and pale pink, capillary refill time < 2 seconds. Lymph nodes palpate normally.

Temperament/handling: good / good.

Digestive system: normal bite on external assessment, no abnormal odor from the mouth. Intestinal sounds on auscultation ++/++/++/++, ileocecal sound audible.

Reproductive and urinary organs: no abnormalities detected.

Eyes examined externally with light and ophthalmoscope: no abnormalities detected.

Head, ears, neck: no abnormalities detected.

Hooves: hoof pulses normal.

Limbs: tendons cool, no pain on palpation or swelling. Joints cool, no swelling or rotational pain. In both frontlimbs healing mud-fever, left front a bit painful in palpation.

Back and pelvis: No pain on palpation of the back or tuber coxae or on SI joint provocation. Flexes the body to the right and left, no pain on spinal flexion or extension.

Movement assessed in hand in walk and trot. Slight asymmetry in left front on the hard ground in trot.
